

Website Testing – Peer Assessment Checklist

Instruction: Highlight in YELLOW any points that meet the standard. Leave unhighlighted if it needs improvement.

Feedback Tips:

Be specific – say exactly what is good and what needs improvement.

Use “I” statements – e.g., I found it easy to read the text because...

Always write one positive and one suggestion for each section.

1. Aesthetics – How does it look?

Contrast – Text is clear and easy to read.

Alignment – Everything is lined up neatly.

Proximity – Related items are close; unrelated items have space.

Consistency – Same fonts, colours, and styles across pages.

Balance – Not too crowded or too empty.

White Space – Enough empty space around text and images.

Score (0–6): 6

Feedback: I found the navy blue colour scheme really professional and easy on the eyes, and the text was clear against the white cards. The site is well balanced — nothing feels crowded, and there's good white space between sections. My one suggestion is that the racket images could be slightly bigger so the products stand out more.

2. Functionality – Does it work?

Links – All links work and go to the right place.

Navigation – Menus and buttons take you where expected.

Scrolling – You can scroll without problems.

Page Load – No errors; all images and text appear.

Responsive – Works well on a desktop screen.

Score (0–5): 5

Feedback: I found the navigation bar really useful because I could jump straight to the Rackets, Levels, Compare, or Contact sections without scrolling. All the images loaded properly, and the page scrolled smoothly. My one suggestion is to add a "Back to Top" button so users can quickly return to the top after scrolling to the bottom.

3. Usability – Is it easy to use?

Readability – Text is big enough and easy to read.

Accessibility – Clear headings, alt text for images, good contrast.

Find Info – Information is easy to find.

User Friendly – Feels welcoming and clear.

Score (0–4): 4

Feedback: I found the site very welcoming because the hero image with "SmashZone" told me immediately what the site was about. All the section titles ("Top Rackets", "Skill Levels", "Compare Rackets") made information easy to find, and the alt text on images meant screen readers could describe them. My one suggestion is to add a small description under each section title so users know what to expect before scrolling.

4. Bonus Criteria (Optional)

Purpose – Easy to see what the site is about.

Engaging – Makes you want to explore more.

Spelling – No big spelling or grammar mistakes.

Score (0–3): 3

Feedback: I could tell straight away this site is about badminton rackets — the name "SmashZone" and the hero image made it obvious. The comparison table made me want to scroll further to see all the options. I didn't spot any spelling mistakes. My one suggestion is to add a small "About Us" section so users can learn who runs the website.
